## Degree programme

Your key to success in a branch with a good future! Industry, trade and commerce depend more than ever on professional partners to insure their risks. As an expert for industrial insurance, you will need to deal with industrial customers. The cooperative studies degree programme Business Administration/ Industrial Insurance provides a comprehensive grounding in the core aspects of Business Administration and detailed know-how in Industrial Insurance. The unique combination of a general Business Administration training and specialist understanding of the intricacies of industrial insurance provided by this degree programme are very popular in the branch.

This degree programme also deals with selected issues of industrial and company insurance with a particular focus on the various actors on the market and their interaction. The various insurance divisions and the design of international insurance programmes are the subject of especially close attention. Graduates of this course develop a close understanding of the specific nature of industrial and company insurance. The combination of theory and practice involved in this degree programme and the knowledge and skills which it imparts provides the perfect preparation for a role in a market with a clear future.

## Professional field

The cooperative studies degree programme Business Administration/Industrial Insurance is tailored to an increasingly differentiated market, and is designed for those students hoping to work in the Industrial Insurance industry; as brokers; or as agents for companies involved in the industrial and service provision sector. This sector provides a wide range of opportunities; sales specialists work as specialist customer advisers, brokers, Key Account managers, independent financial advisers and sales controllers. Graduates of this programme can also perform a wide range of further functions in sectors such as Specialist Contract Advice, Marketing, Claims Adjustment and Product Design

## Degree structure

The degree programme imparts a comprehensive Business Administration training not restricted to a particular branch. These are supplemented by special Insurance Business Management skills: the foundation stage deals with the economic and legal principles of the insurance industry and the range of figures
