**Programme:** M.Sc. International Finance

**Required Preconditions:**

Knowledge in Finance and Accounting from basic and medium - level courses

**Learning Outcomes and Competences:**

The major aim of the course is to provide students with an understanding of the inter- relationship between globalisation of the financial services industry and the growth of international markets. After a successful completion of the course, students will be familiar with the role and operation of international securities, derivatives and foreign exchange markets and euro-currencies markets. They will understand how international corporations make use of international cash management strategies. Finally, they appreciate how corporations can raise capital through international financial markets. There will be a close link between financial market instruments and risk management strategies.

**Content of Course:**

Global finance and the nature of international financial markets such as the foreign exchange markets, derivative markets, the Euro-currency market, international bond markets, foreign direct investment, international cash management, risk management in corporate finance, financing foreign trade, international banking, portfolio management.
