**Startup Incubator Berlin, das Gründungszentrum der HWR Berlin**

[Zur Website](#)

In addition to economics students, we also address the other departments of the HWR Berlin specifically: because innovative solutions such as startups can deliver are just as much in demand in the future-oriented security management sector as they are for the modernization of federal and state administration, and equally in public-sector companies. A lot of potential for founders of the HWR Berlin! They particularly benefit from its diverse, active network with different partners from industry and politics as well as from international collaborations.

In the Startup Incubator of the HWR Berlin, startup ideas are developed to market maturity. To this end, we support academic founding teams with know-how, infrastructure and grants. Our offer is open for everyone at the beginning of their start-up project or already well into their active startup phase. In the latest "Gründungsradar 2020", the Stifterverband der deutschen Wissenschaft confirmed the top position of the HWR Berlin in the startup capital.

In this online information event, the funding programs and benefits of the Startup Incubator Berlin will be presented for those interested in founding a company. After this information segment there is an opportunity for questions and an interactive discussion. Do you want to get your startup off the ground? Then look no further!

You can take part in this online event from the comfort of your home on your computer or tablet. All you need is an up-to-date browser, an internet connection and speakers or headphones. You will receive the access link (MS Teams) for the webinar in the confirmation of your registration by e-mail.
