How can we promote diversity? We want to live by our commitment to diversity - and we need you, your experiences, and your perspectives! Whatever else we need for this, we would like to find out together with you.

On Diversity Day, we would like to introduce you to the new Diversity Charter of the HWR Berlin, discuss diversity issues, and focus in particular on first generation students and multilingual students:

What special talents and perspectives do multilingual students and people who are the first in their family to study bring to the university? What opportunities and conditions should they find in order to make the best possible use of their knowledge and skills? What needs and measures arise from this? Is origin - social or cultural - experienced as relevant in the context of the university and on the way through studying?

Be curious and join the discussion - no matter where you are from or if you study, teach, or work at HWR Berlin.

Please note, that parts of the event will be held in German only (but your contribution can be made in English).
