Eckhard Hein
Distribution and Growth after Keynes: A Post-Keynesian Guide (Edward Elgar 2014)

## Errata

## Chapter 1: Introduction

p. 8: Equations (1.11), (1.11a) and (1.11b) should be:

$$
\begin{equation*}
(1-\mathrm{h})_{\mathrm{LI}}=\hat{\mathrm{w}}-\hat{\mathrm{p}}-\hat{\mathrm{y}} . \tag{1.11}
\end{equation*}
$$

$$
\begin{equation*}
(1-\mathrm{h})_{\mathrm{LI}}>0, \quad \text { if }: \quad \hat{\mathrm{w}}>\hat{\mathrm{p}}+\hat{\mathrm{y}}, \tag{1.11a}
\end{equation*}
$$

$$
\begin{equation*}
(1-\mathrm{h})_{\mathrm{LI}}<0, \quad \text { if }: \quad \hat{\mathrm{w}}<\hat{\mathrm{p}}+\hat{\mathrm{y}} . \tag{1.11b}
\end{equation*}
$$

p. 9: last paragraph, in the $2^{\text {nd }}$ line it should be:
... except for Italy and the US, higher inflation rates ..
p. 13: in the $2^{\text {nd }}$ and $3^{\text {rd }}$ line it should be:
... labour productivity growth, real long-term interest rates and inflation rates on average ...
p.14: note 1 in Table 1.1 should be:

West Germany from 1960 to 1992.
p. 15: $2^{\text {nd }}$ paragraph, in the $14^{\text {th }}$ to $16^{\text {th }}$ line it should be:
... The only exceptions to this were Spain and the US during the cycle of early 2000s, the former benefitting ....
p. 15: $2^{\text {nd }}$ paragraph, in the last line it should be:
... could be observed, and Japan with an increase in the cycle of the 1980s.

## Chapter 2: From Keynes to Domar and Harrod: considering the capacity effect of investment and an attempt at dynamic theory

p. 32: last paragraph, in the $7^{\text {th }}$ line it should read:
$\ldots$ intersection of the saving function ( $\sigma$ ) from equation (2.9) ...

Chapter 3: Neoclassical distribution and growth theory: old and new - and a critique
p. 72: $2^{\text {nd }}$ paragraph, in the fourth line it should be:
... Figures 3.8 and 3.9 ...
p. 73: in Figure 3.8 it should be:
$\log$ ув
p. 81: $4^{\text {th }}$ paragraph, in the last but one line it should be:
$\ldots$ intermediate products $\left(\mathrm{x}_{\mathrm{i}}\right)$....

## Chapter 4: Post-Keynesian distribution and growth theories I: Kaldor, Pasinetti, Thirlwall and Robinson

p. 158, equation (4.45) should be:
(4.54) $\mathrm{s}_{\Pi}=\frac{\mathrm{s}_{\Pi}}{\Pi}=\frac{\Pi-\mathrm{R}+\mathrm{s}_{\mathrm{R}} \mathrm{R}}{\Pi}=\mathrm{s}_{\mathrm{C}}+\mathrm{s}_{\mathrm{R}}\left(1-\mathrm{s}_{\mathrm{C}}\right)$

Chapter 5: Post-Keynesian distribution and growth theories II: Kalecki and Steindl
p. 187, equations (5.6) and (5.7) should be:
(5.6) $\left(\frac{\Pi}{Y}\right)_{j}=m_{j}\left(w a_{j}+p_{m} \mu_{j}\right)=m_{j} w a_{j}\left(1+z_{j}\right)$,
(5.7) $\quad h_{j}=\frac{\Pi_{j}}{\Pi_{j}+W_{j}}=\frac{m_{j} w a_{j}\left(1+z_{j}\right)}{m_{j} w a_{j}\left(1+z_{j}\right)+w a_{j}}=\frac{\left(1+z_{j}\right) m_{j}}{\left(1+z_{j}\right) m_{j}+1}=\frac{1}{1+\frac{1}{\left(1+z_{j}\right) m_{j}}}$
p. 199, equation (5.23) can be improved making use of $W^{\text {net }}=\frac{(1-\mathrm{h}) \Pi^{\text {net }}}{\mathrm{h}}$ and should thus be: ${ }^{1}$
(5.23) $\Pi^{\text {net }}=\frac{p_{\mathrm{K}} \mathrm{I}+\mathrm{G}-\mathrm{T}+\mathrm{p}_{\mathrm{X}} \mathrm{X}-\mathrm{p}_{\mathrm{M}} \mathrm{M}}{\mathrm{s}_{\Pi}+\mathrm{s}_{\mathrm{w}} \frac{1-\mathrm{h}}{\mathrm{h}}}$.

[^0]p. 209: Figure 5.3 should be:

Source: Based on Lavoie (1992, p. 117)
Figure 5.3: Maximum rate of profit and maximum rate of growth of the firm

Chapter 6: The basic Kaleckian distribution and growth models
p. 255: Figure 6.4 b) should be:

b) Profit rate and capacity utilisation

Figure 6.4: Reducing the propensity to save out of profits in the neo-Kaleckian distribution and growth model: the paradox of saving
p. 261: $1^{\text {st }}$ paragraph, third line shoud be:
depend on the parameters ...
p. 265: in Table 6.1 it should be:

Wage-led regime
Wage-led (stagnationist) demand and wage-led accumulation/growth: ...

Chapter 7: Extending Kaleckian models I: saving out of wages and open economy issues
p. 274 and p. 282: equation (7.3) should be:

$$
\begin{align*}
\sigma= & \frac{\mathrm{S}_{\Pi}+\mathrm{S}_{\mathrm{w}}}{\mathrm{pK}}=\frac{\mathrm{s}_{\Pi} \Pi+\mathrm{s}_{\mathrm{w}}(\mathrm{pY}-\Pi)}{\mathrm{pK}}=\left[\mathrm{s}_{\mathrm{w}}(1-\mathrm{h})+\mathrm{s}_{\Pi} \mathrm{h}\right] \frac{\mathrm{u}}{\mathrm{v}}=\left[\mathrm{s}_{\mathrm{w}}+\left(\mathrm{s}_{\Pi}-\mathrm{s}_{\mathrm{w}}\right) \mathrm{h}\right] \frac{\mathrm{u}}{\mathrm{v}}  \tag{7.3}\\
& 0 \leq \mathrm{s}_{\mathrm{w}}<\mathrm{s}_{\Pi} \leq 1
\end{align*}
$$

p. 289: equations (7.26) and (7.28) should be:
(7.26) $\mathrm{S}=\mathrm{pI}+\mathrm{pX}-\mathrm{ep}_{\mathrm{f}} \mathrm{M}=\mathrm{pI}+\mathrm{NX}$

$$
\begin{equation*}
\sigma=\frac{\mathrm{s}_{\Pi}+\mathrm{S}_{\mathrm{w}}}{\mathrm{pK}}=\frac{\mathrm{s}_{\Pi} \Pi+\mathrm{s}_{\mathrm{w}}(\mathrm{pY}-\Pi)}{\mathrm{pK}}=\left[\mathrm{s}_{\mathrm{w}}+\left(\mathrm{s}_{\Pi}-\mathrm{s}_{\mathrm{w}}\right) \mathrm{h}\right] \frac{\mathrm{u}}{\mathrm{v}}, \quad 0 \leq \mathrm{s}_{\mathrm{w}}<\mathrm{s}_{\Pi} \leq 1 \tag{7.28}
\end{equation*}
$$

p. 292: equations (7.35a) and (7.35b) should be:
(35a) $\frac{\partial \mathrm{b}^{*}}{\partial \mathrm{~s}_{\Pi}}=\frac{\phi \frac{\mathrm{h}}{\mathrm{v}} \mathrm{u}}{\left[\mathrm{s}_{\mathrm{W}}+\left(\mathrm{s}_{\Pi}-\mathrm{s}_{\mathrm{W}}\right) \mathrm{h}\right] \frac{1}{\mathrm{v}}-\beta+\phi}>0$,
(35b) $\frac{\partial \mathrm{b}^{*}}{\partial \mathrm{~s}_{\mathrm{W}}}=\frac{\phi(1-\mathrm{h}) \frac{1}{\mathrm{v}} \mathrm{u}}{\left[\mathrm{s}_{\mathrm{w}}+\left(\mathrm{s}_{\Pi}-\mathrm{s}_{\mathrm{W}}\right) \mathrm{h}\right] \frac{1}{\mathrm{v}}-\beta+\phi}>0$.

Chapter 8: Extending Kaleckian models II: technical progress
p. 315: equation (8.3) should be:

$$
\begin{equation*}
\sigma=\frac{\mathrm{S}_{\Pi}+\mathrm{S}_{\mathrm{w}}}{\mathrm{pK}}=\frac{\mathrm{s}_{\Pi} \Pi+\mathrm{s}_{\mathrm{w}}(\mathrm{pY}-\Pi)}{\mathrm{pK}}=\left[\mathrm{s}_{\mathrm{w}}+\left(\mathrm{s}_{\Pi}-\mathrm{s}_{\mathrm{w}}\right) \mathrm{h}\right] \frac{\mathrm{u}}{\mathrm{v}}, \quad 0 \leq \mathrm{s}_{\mathrm{w}}<\mathrm{s}_{\Pi} \leq 1 . \tag{8.3}
\end{equation*}
$$

Chapter 10: Extending Kaleckian models IV: finance-dominated capitalism
p. 386: Figure 10.4 should be:

Note: In percentages.
Source: Hein (2014, p. 9). Data source: Alvaredo et al. (2012).
Figure 10.4 Top 0.1 per cent share in national income in Germany and the Netherlands
p. 389: Figure 10.7: Keys exceed the frame
p. 398: Equation (10.10) should be:

$$
\begin{equation*}
\mathrm{g}=\frac{\mathrm{pI}}{\mathrm{pK}}=\alpha+\beta \mathrm{u}+\tau \mathrm{h}-\theta \rho \gamma, \quad \beta, \tau, \theta \geq 0 \tag{10.10}
\end{equation*}
$$

## Appendix

p. 482: Equation (A.1.4b) should be:
(A.1.4b) $\quad \frac{\partial y}{\partial t} \frac{1}{y}=\frac{\partial x}{\partial t} \frac{z}{x z}+\frac{\partial z}{\partial t} \frac{x}{x z}$

[^0]:    ${ }^{1}$ I am most grateful to Won Jun Nah for pointing this out to me.
